- FIGMA
- TypeScript

Language

English

Bengali

About Me

In 2020, sparked by a Jhankar Mahbub tutorial, I began my web development journey on W3Schools. Overcoming challenges, I explored HTML, CSS, JavaScript, PHP, and Bootstrap. In 2021, a Programming Hero course immersed me in MERN Stack development. Despite frustrations, I persevered, crafting MERN projects and gaining confidence. Advancing into TypeScript, Next.js, and Mongoose, I now feel well-prepared for a web development career.

Work Experience

OCT 2023 - present

Center for Multidisciplinary Research and Development (CeMRD)

Junipr FullStact Developer
